

## 1 BUSINESS STATEMENT

Denith is a highly innovative engineering company providing concepts, systems design, detail design, and manufacturing solutions to the mining, energy and construction industries, both land-based and marine.

Denith's Business Management System (BMS) is certified to ISO 9001:2015 and compliant to aspects and clauses of ISO 14001:2015 and ISO 45001:2018.

### 1.1 Quality Commitments

- Denith commits to establishing long term relationships based on experience and trust with our clients and suppliers by providing services of the highest quality in accordance with the requirements of our BMS.
- Denith commits to continually improving our BMS through client focus, feedback from interested parties and analysis of our own performance.
- Denith commits to adhere to the legal requirements of The Republic of South Africa as well as the international requirements of the clients we work with.
- Denith commits to providing a work place where our team can learn, grow and develop.

### 1.2 Operational Health and Safety (OH&S) Commitments

- Denith is committed to providing a safe working environment by identifying, analysing and reducing risk of injury, ill health and damage to property of our staff members and 3rd parties during the realisation of our products and services.

### 1.3 Environmental Commitments

- Denith encourages environmental awareness through impact assessments, considerate design and the implementation of our environmental processes.
- Denith is committed to encouraging sustainability through recycling, reducing water and energy consumption and keeping the use of non-recyclable products to a minimum.
- Denith shall determine whether climate change is a relevant issue and note that relevant interested can have requirements related to climate change.
